

FIDGET AND THE TWITCHERS

TECHNICAL SPECIFICATIONS

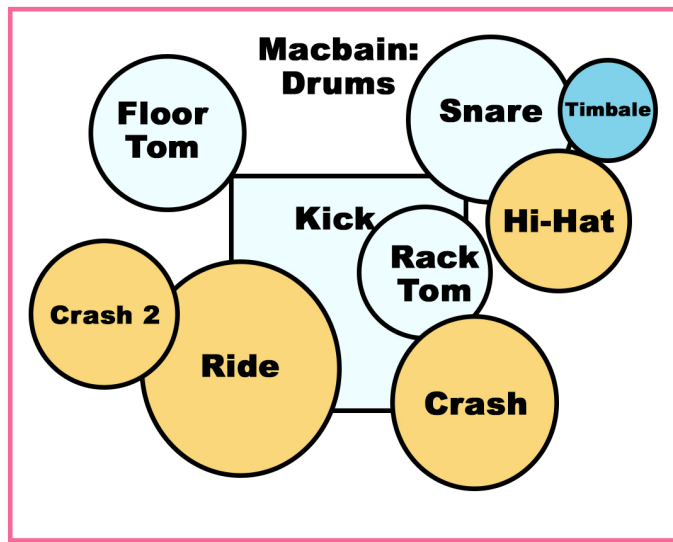

Hi, we are a seven-piece ska-punk band, with a guitarist, bassist, drummer, a four-piece horn section, and occasional keyboard parts. We use a wireless in-ear monitor system.

Listed below is our ideal setup, but we are happy to adapt and work with whatever you can accommodate. We can supply backline (drum shells, amps, mics, mic stands) upon request, but prefer to use house equipment if possible.

Band Member	Instruments	Notes
Danny (Fidget)	Electric Guitar Lead Vocals	Uses pedal board with amp simulation, and mono 1/4" Jack output. DI Required. On-stage guitar amp in addition to DI is favourable but not essential. Primarily overdriven tone with various other effects used sporadically. Likes vocals mostly dry.
Ben	Bass Guitar Backing Vocals	1/4" jack output from pedal, DI required. On-stage amp preferred but not essential. Effects used sparingly.
Macbain	Drums	Full kit with Timbale.
Fred	Trombone Keytar Flute Backing Vocals	Wireless dynamic mic for trombone, XLR output. DI required for Keytar (stereo preferred). Delay FX pedal used on vocal/flute mic.
Emm	Trumpet Backing Vocals	Wireless dynamic mic, XLR output.
Tom	Baritone Horn Backing Vocals	Wireless dynamic mic, XLR output.
Nooch	Baritone Saxophone Backing Vocals	Wireless dynamic mic, 1/4" jack output, DI required.

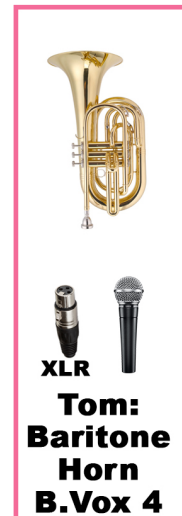

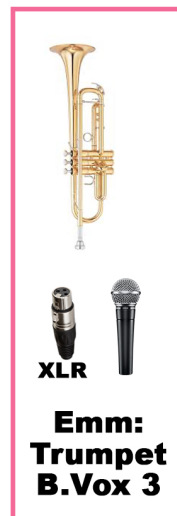

STAGE PLAN

Guitar Amp
(Optional)
